

Jasmin Fazilova

AI Product Builder

Worldwide remote | hello@ricusso.com | ricusso.com | github.com/ricusso | behance.net/zhasminfazilovaf

AI Product Builder who turns ideas into working digital products with AI, product thinking, UX/UI and AI-assisted building. Directs AI across framing, interface design, implementation, iteration and QA; tests the integrated result and communicates honest limits.

SELECTED WORK

Mercy Tools

AI Product Builder | tools.ricusso.com

- Directed AI-assisted product framing, interface decisions, implementation iteration and QA for a public utility-product platform.
- Worked across reusable interface patterns, search and SEO surfaces; public project evidence is available at the linked product.

MIST VPN

Product concept and web experience | ricusso.com/work/mist

- Shaped an AI-assisted privacy-product journey across acquisition, account, devices, subscription and connection states.
- Directed UX/UI, implementation iteration and QA of the responsive visual demo. Boundary: no live VPN network, users, payments or production-security outcome is claimed.

ACTIVE

Full-stack product prototype | ricusso.com/work/active

- Directed a gamified quest experience across player, expert and admin surfaces, including quests, daily proof, XP, streaks and mentor feedback.
- Used AI assistance under Jasmin's direction for iteration, integration and QA. Boundary: public data and accounts are illustrative demo states.

ILLUSION

UX flow and visual system | ricusso.com/work/illusion

- Built an editorial cinema flow spanning discovery, screening selection, seats and browser-only booking state.
 - Directed the visual system, responsive UX, iteration and QA of the public static build.
-

CAPABILITIES

Product: product framing, user flows, information architecture, UX/UI, responsive interface states, prototyping and QA

AI-assisted building: model and tool direction, rapid iteration, integration, debugging and evidence-based acceptance

Project technologies: HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, EJS, PostgreSQL, Git and GitHub

EDUCATION AND CREDENTIALS

Secondary vocational education - specialty 09.02.07 Information Systems and Programming; qualification: Developer of Web and Multimedia Applications; diploma issued 30 Jun 2026.

Professional development, 2026: Modern IT Solutions (60h); Internet Technologies (128h).

1C:Professional - 1C:Enterprise 8.3 core mechanisms, issued 13 Dec 2024.
